

ORGANISER DIPLOMA

CHI LINH

Aarhus Symposium is an annual leadership conference at Aarhus BSS - Aarhus University, every year on the first Friday in November. The event aims to connect leaders of today with leaders of tomorrow. In doing so, key decision-makers are invited to share their experiences on a relevant theme and engage in discussions with the 650 participating students. Hereby, the symposium allows students to relate their academic insights to the broader business society. Aarhus Symposium is a non-profit organisation run by 38 ambitious voluntary students and a pro-bono Board of Directors.

Chi Linh has been an organiser in the IT Group of Aarhus Symposium 2024. The IT Group is responsible for overseeing and supporting the IT systems of Aarhus Symposium. This involves managing the official website, setting up a sign-up and check-in system, ensuring that e-mail communication and internal file sharing are running efficiently, and providing general IT support to the other organising groups.

Being part of Aarhus Symposium, Chi Linh has shown an extraordinary will and dedication to create the greatest leadership conference for students in the North. The volunteer work has provided valuable real-life experiences and developed important professional skills such as formal communication, teamwork, and project management.
